CAREER OBJECTIVE:

I'm a front-end web developer with a passion for crafting immersive and responsive user experiences. My goal is to join a dynamic team, learn, grow, and contribute to building user-centric web applications.

SKILLS:

Expertise: HTML5, CSS3, Bootstrap, Tailwind, DaisyUI, Ant design, Javascript and ReactJS.

Comfortable: Redux, Firebase, Express.js, MongoDB, JWT and Axios.

Familiar: Node Js, Trello, MUI.

Soft Skills: Adaptability, Good Communication, Collaboration and Teamwork

Tools: VS Code, GitHub, Figma, Vercel, Netlify

PROJECTS:

Team Project - Tripsure

[Live site](#)

[Client code](#)

[Server code](#)

- Authentication , Redux , Chat bot, SSLcommerce, and few more technologies.
- You can search for country for restaurant for hotels for any specific area.
- Only logged-in user can take all facilities. Without logging user can't access all parts in our website.
- Providing travel deals, packages , top destinations and category.

Technologies: HTML, Tailwind, Ant Design, Firebase, React, Express, Mongoddb, Redux

Personal project :

E_Class

[Live site](#)

[Client code](#)

[Server code](#)

- It is fully responsive for all this devices .
- The routes are divided into separate categories for users, admins, and instructors, depending on their respective roles.
- Users are able to select the classes they want and enroll with a simple click.
- Instructors have the ability to add, update, and delete their own classes. Admin can manage all class and many more.

Technologies: HTML, Tailwind, DaisyUI, Firebase, React, Express, Mongoddb and JWT

Robot Toy

[Live site](#)

[Client code](#)

[Server code](#)

- Developed a responsive website using tailwind css.
- user can search and filter based on toy name or category.
- Users create accounts with their email, username, and password. And also registered users log in with their credentials.
- Users can add, delete, and update their classes. However, they cannot perform these actions without logging in.

Technologies: HTML, Tailwind, DaisyUI, Firebase, React, Express and Mongoddb
